

RUBINA GURAGAIN

469.968.6139

rubinaguragain@gmail.com

EDUCATION

The University of Southern Mississippi May 2026 **Bachelor of Science in Computer Science**
GPA: 3.94 *Hattiesburg, Mississippi*

RELEVANT COURSEWORK

Data Structures, Operating Systems, Secure Software Development, Database Systems, Digital Forensics, Computer Networks

EXPERIENCE

Math Tutor

The University of Southern Mississippi | Aug 2024 – Present

- Conducted in-person math instruction for college students, delivering clear and comprehensive lessons
- Played a key role in enhancing students' math skills and academic performance through targeted guidance and support
- Implemented effective teaching strategies to facilitate understanding and engagement, contributing to overall academic success

PROJECTS

Full-Stack Flower Store Web Application – MERN Stack

- Built a full-stack e-commerce website using MongoDB, Express.js, React.js, and [Node.js](#).
- Developed product catalog, shopping cart, and order management for seamless user experience.
- Designed both front-end and back-end systems for efficient database integration and interactive UI.

Automated Greenhouse System – ESP32 & Android Studio

- Developed a smart greenhouse system with moisture, temperature, and humidity sensors.
- Created an Android app to track real-time plant data remotely.
- Implemented automated watering based on soil moisture, ensuring optimal plant health.

Academic Advisement Application (React.js + Python + Flask)

- Developed a full-stack academic planning system to generate personalized course recommendations
- Built React.js front-end for transcript input and student interaction
- Implemented Python/Flask backend to process transcript data and enforce prerequisite logic
- Designed structured course filtering based on degree requirements
- Collaborated in a team-based Git environment

SKILLS

- **Programming & Development:** C/C++, Python, JavaScript (MERN Stack), REST APIs, JSON
- **Web & App Development:** Front-end (React.js), Back-end (Node.js, Express.js), Database integration (MongoDB)
- **Embedded Systems & IoT:** ESP32 microcontrollers, sensor integration (moisture, humidity, temperature), automated system design
- **Digital Forensics Tools:** FTK Imager, Wireshark, Cellebrite (academic exposure), log analysis
- **Software Tools:** Android Studio, Git/GitHub, Microsoft Office
- **Problem Solving & Collaboration:** Debugging, algorithm design, teamwork, project management, attention to detail
